Wordpress (WooCommerce) - TrustPay Payments Implementation Guide

This document describes the steps to be taken to integrate TrustPay Payments into your WordPress (WooCommerce) e-commerce website.

1. Register for a TrustPay Vendor Key:

- Goto <https://my.trustpay.biz>
- Click on SignUp and create a new user account.

The screenshot shows a web browser window with the TrustPay logo and navigation links at the top. The main heading is "Create your free personal account" with a link to "Sign in to an existing account". The form is divided into two sections: "Personal Details" and "Account Details".

Personal Details:

- Firstname: Open
- Surname: Open
- Cart: Open
- Company name: OpenCart

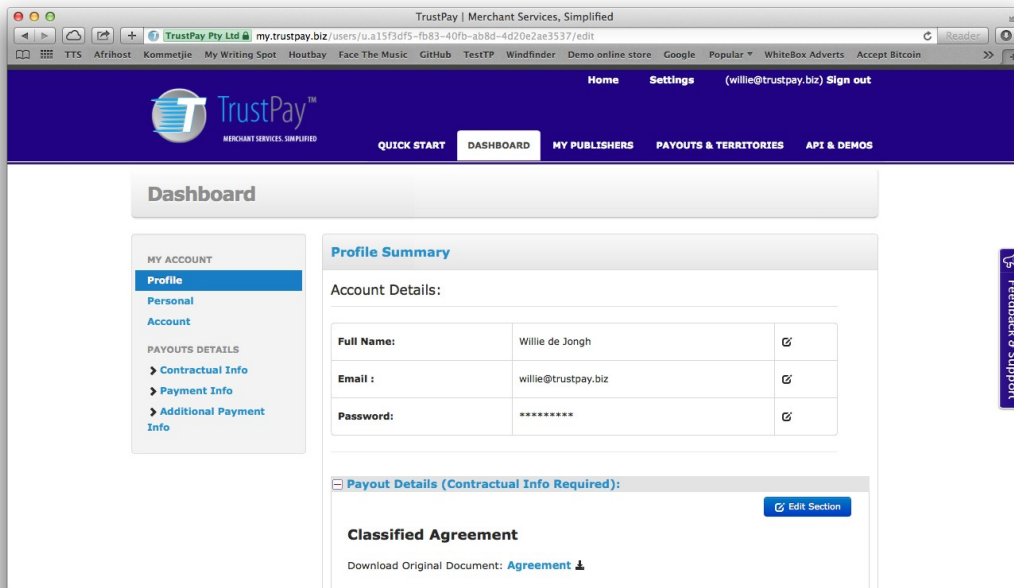

Account Details:

- Email: info@trustpay.biz
- We promise we won't share your email with anyone.
- Password: *****
- Tip: use at least one number and at least 7 characters.
- Password Confirmation: *****

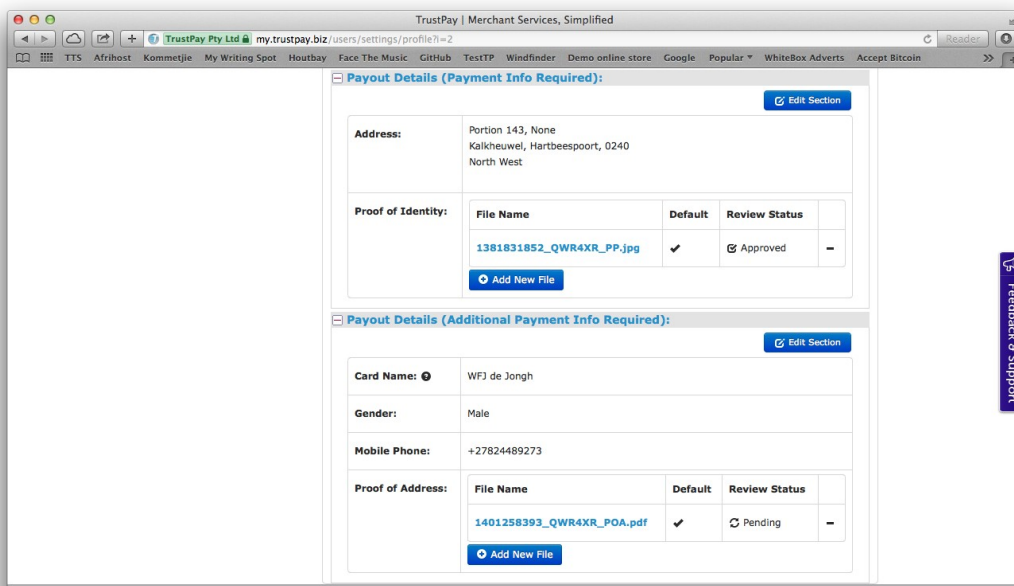

By clicking on "Create my account" below, you are agreeing to the [Terms of Use and Privacy Policy](#).

[Create my account](#)

- You have to verify your email and then you can sign in to <https://my.trustpay.biz>
- Goto Settings > Profile to complete KYC information.

- You have to download the TrustPay agreement, print it, sign it, scan it and upload again.
- You have to upload a copy of your Identity document or passport and proof of residence. This will enable us to pay you up to USD 20,000 per month.

- Create a new Application for your Wordpress e-Commerce website

QUICK START DASHBOARD MY PUBLISHERS PAYOUTS & TERRITORIES API & DEMOS

Publishers

✓ Sign up for a personal account → ✓ Setup your publisher → **Register your application** → Configure your payment methods

Register New Application

Publisher Details

Publisher Name

Application Details

Application Name

Notification URL

URL to which notifications associated with your application will be sent to.

Shared Secret

A shared secret for signing notifications associated with your application.

[Add Application](#) [Cancel](#)

Applications have their own context

The application you choose to create on the following screen will be assigned to the Publisher selected.

Notification URLs

When a transaction occurs, our server can notify yours via this URL. The message is signed with the shared secret to prevent spoofing.

Feedback & Support

- The notification URL must be : http://your.wordpress.url/?wc-api=WC_Gateway_TrustPay/
- Where “<http://your.wordpress.url/>” is the URL to your Wordpress installation.
- Shared-Secret is any secure shared secret you choose.
- The Notification URL and shared-secret have to be configured on the Drupal side as well.
- Select the territories and payment methods that you want to support.

Feedback & Support

- Go to Application that you have created and take note of the **“Application ID”**

2. Install TrustPay Module in your WordPress installation:

- Visit <http://www.woocommerce.com> and under Extensions, search for “TrustPay” extension.
- The “TrustPay” WooCommerce extension has the following very dependency modules:
 - o WooCommerce
 - o OAuth Provider
- Install the plugins as with like any other Wordpress plugin via Administration >Plugins

3. Configure Wordpress installation for TrustPay Module:

- Log into your Wordpress Admin section
- Click on WooCommerce > Settings > Checkout

Payment methods

Home > Administration > Store settings > Advanced store settings > Payment methods

Payment methods are enabled for use by the rule configurations listed below. An enabled payment rule can specify a payment method to enable using one of the available *Enable payment method* actions. The action's settings form will contain any necessary settings for the payment method that must be configured before it may be used.

[+ Add a payment method rule](#)

Enabled payment method rules

Name	Event	Status	Operations
Example payment Machine name: commerce_payment_commerce_payment_example, Weight: 0 Tags: Commerce Payment • Available on the checkout form • Available on the order payment terminal	Select available payment methods for an order	Default	edit disable clone export
TrustPay Machine name: commerce_payment_commerce_trustpay, Weight: 0 Tags: Commerce Payment • Available on the checkout form • Available on the order payment terminal	Select available payment methods for an order	Overridden	edit disable clone revert export

Disabled payment method rules

Name	Event	Status	Operations
American Express Machine name: commerce_payment_amex_hosted, Weight: 0 Tags: Commerce Payment • Available on the checkout form • Available on the order payment terminal	Select available payment methods for an order	Default	edit enable clone export

NEED MORE OPTIONS FOR PAYMENTS?
Commerce PayPal 2.0 now offers Express Checkout, Payments Advanced & Payflow Link.

- Click on the “Settings” button link next to TrustPay.
- You will see the following page:

Editing action "Enable payment method: TrustPay"

Home » Administration » Store settings » Advanced store settings » Payment methods » Editing reaction rule "TrustPay" » Editing action "Enable payment method: TrustPay"

Order

Data selector
commerce-order

The data selector helps you drill down into the data available to Rules. To make entity fields appear in the data selector, you may have to use the condition 'entity has field' (or 'content is of type'). More useful tips about data selection is available in the [online documentation](#).

Data types: Select data of the type Commerce Order.

Data selectors

Switch to the direct input mode

Payment settings
